SNOWY DAY

Snowflake Facts

Read these cool facts with a grown-up!

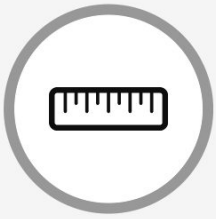

Six arms

Frozen ice has a six-sided crystal shape. That is why snow crystals often grow six arms.

One of a kind

Each snowflake meets its own mix of changes in the cloud, so no two are ever truly identical.

Tiny flakes

Most snowflakes are smaller than half an inch (1.3 cm) across.

Why so white?

Snow looks white because it reflects most of the sunlight that hits it.
