Star Facts

Read with a grown-up, then look for these stars on a clear night!

3 stars in a row

Find Orion's Belt

You can find Orion by the three bright stars in a row that make Orion's Belt.

Brightest star

Sirius, the Dog Star, is the brightest star in the night sky.

Seven Sisters

The Pleiades star cluster can be seen without a telescope.

Star seasons

Some stars can only be seen in certain months of the year.

Our own star

The Sun is a star too. It is our solar system's only star.
