# Ice Lab: Melt It, Freeze It

Two experiments to try with a grown-up: melt an ice cube, then freeze it again. Number the steps from 1 to 5.

☐

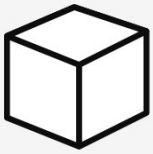

Last, think: a cooked egg can't change back.

☐

First, put one ice cube in a cup.

☐

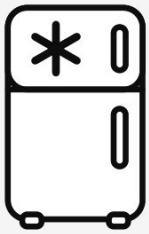

The next day, the water is ice again!

☐

Next, watch the ice melt into water.

☐

Then a grown-up puts the cup in the freezer.
